

1st step

Area need
to be
seeded

3rd step

Seed dispersal at
correct location

Seed
ball

4th step

Remember the
location for future
analysis of growth of
tree.

Selection and collection
of seed from the tree
which suits best there
and give fruits as well.

2nd step

4. Drone deployment

1. Aerial survey

Checking requirements

5. Postgrowth Monitoring

3. Seed balls preparation

Base Station

Seed ball

2. Understanding requirements

HOW IT WORKS?
