

4th step

Remember the location for future analysis of growth of tree.

2nd step

Selection and collection of seed from the tree which suits best there and give fruits as well.

3rd step

Seed dispersal at correct location

Area need to be seeded

1st step

Seed ball

4. Drone deployment

1. Aerial survey

Checking requirements

5. Postgrowth Monitoring

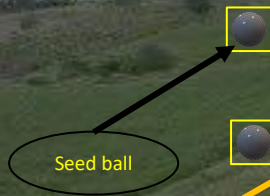

3. Seed balls preparation

Base Station

2. Understanding requirements

Seed ball

HOW IT WORKS?
